

PROJECT EVOLVE

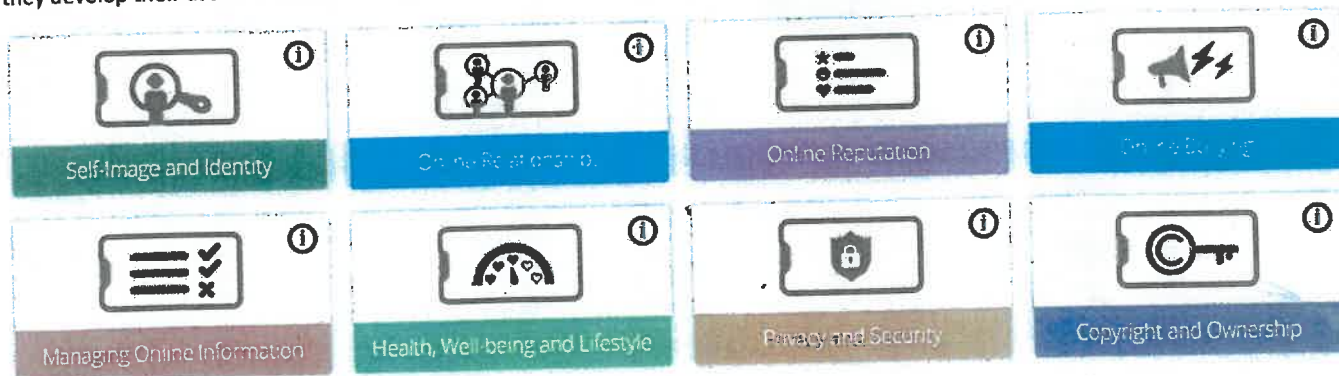

The ProjectEVOLVE toolkit is based on the UKCIS framework "Education for a Connected World" (EFACW). The framework covers knowledge, skills, behaviours and attitudes across eight strands of our online lives from early years right through to eighteen. These units are mapped to your child's year group. The units guide teachers to the areas that they should be discussing with children as they develop their use of online technology.

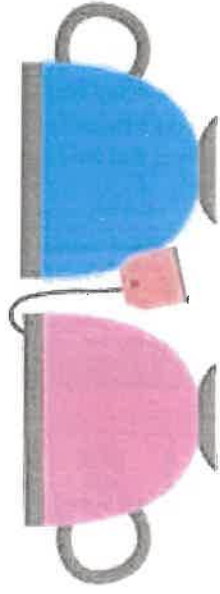

The new Evolve units are mapped in our PSHE booklets, so you can see what your child will be discussing in our Online Safety lessons throughout the year. These booklets are also available on our website.
